

SUDDHODHAN JAJULA

AI/ML Engineer · RAG & LLM Systems · Cloud Architecture (Azure | AWS)

suddhu11050@gmail.com | +81 90-8113-9719 | Tokyo, Japan | [GitHub:Suddhu-IITH2004](#) | [IEEE INDICON 2023](#)

PROFESSIONAL SUMMARY

AI/ML Engineer at Otsuka Holdings Japan, shipping production RAG systems, multimodal LLM evaluation pipelines, and enterprise automation on AWS and Azure. Built and deployed a RAG knowledge chatbot serving 500+ internal users across 1,000+ corporate documents. Conducted benchmark evaluation across 3 industry-standard datasets (NFCorpus, FinanceBench, InfographicVQA) to drive enterprise model selection. IIT Hyderabad graduate (CGPA 9.02) and IEEE-published researcher with a track record of government-recognized social impact applications.

PROFESSIONAL EXPERIENCE

Otsuka Holdings Co., Ltd.

AI/ML Engineer

Oct 2025 – Present

Tokyo, Japan

Cohere MLM Evaluation Framework

Python · Cohere API · NFCorpus · FinanceBench · InfographicVQA · NLP Benchmarking

- Designed an **enterprise LLM evaluation framework** benchmarking Cohere's Multimodal Language Model across **3 industry-standard datasets**: NFCorpus (9,964 medical documents, 3,244 queries), FinanceBench (361 financial filings, 50,000+ pages), and InfographicVQA (5,485 infographics, 30,035 questions).
- Evaluated **Text Retrieval and Image Retrieval** accuracy for RAG pipelines across English and Japanese content; produced structured benchmark documentation that **directly informed enterprise model selection** for production systems.
- Established a **reusable, dataset-agnostic evaluation framework** reducing future LLM assessment cycle time and enabling repeatable benchmarking for model upgrade decisions.

Ryukan Godo GPT — Otsuka's Enterprise RAG Knowledge Chatbot

GPT-4 · OpenAI text-embedding-large-3 · Amazon OpenSearch · Hybrid Search · AWS · React

- Architected and deployed a **production RAG chatbot from scratch** serving **500+ internal users**, indexing **1,000+ confidential corporate documents** to make Otsuka's institutional knowledge instantly searchable.
- Built the full **embedding pipeline** (OpenAI text-embedding-large-3 + Amazon OpenSearch) with a **high-overlap chunking strategy** for context preservation and a **hybrid retrieval system** balancing semantic vector search and BM25 keyword matching with tuned weights.
- Implemented **cross-encoder reranking** on retrieved candidates and **parallel processing with threading** to reduce answer latency, delivering grounded, hallucination-reduced responses via GPT-4.
- Deployed **complete AWS cloud infrastructure** and built the React frontend — shipping an end-to-end production system with zero prior codebase.

Process Automation & Business Intelligence

Microsoft Power Automate · Power BI · Excel · Azure · Python

- Automated the **Prepaid Expenses email workflow** using Microsoft Power Automate, reducing manual processing time and effort by **~50%** compared to the previous manual process.
- During a critical **Microsoft Office outage (Jan 23–24, 2026)**, independently engineered an emergency automation pipeline in **one day** to re-route and individually re-deliver **10,000+ undelivered emails** company-wide — preventing major operational disruption.
- Delivered **real-time Power BI dashboards** surfacing key business metrics, enabling data-driven decisions without analyst bottlenecks.

KEY PROJECTS

Multiscale 3D Visualisation — IEEE INDICON 2023

2023 – 2024

Three.js · WebGL · VR · Python · [DOI: 10.1109/INDICON59947.2023.10440757](#)

- Researched and built a **multiscale 3D visualisation system** for cultural heritage sites using crowd-sourced imagery under Prof. Soumya Jana; research **published at IEEE INDICON 2023**.
- Developed a fully **interactive VR-enabled 3D website** with real-time rendering and smooth user controls for immersive heritage exploration.

Suzuki AGILE Project — Rural Mobility Innovation

Sep 2023 – Feb 2024

Mobile Application Development · Rural Technology

- ▶ Built and launched the **Tomodachi Application** across **4 villages** as part of a Suzuki-backed rural development initiative, directly improving connectivity and accessibility for underserved communities.

Prescription Audit App — Vikarabad PHCs

Dec 2024 – Mar 2025

Healthcare Technology · Tech for Social Good

- ▶ Developed a Prescription Audit Application for frontline PHC workers across Vikarabad district; recognized with a **Letter of Appreciation from the District Collector** for measurable improvement in prescription management.

Smart Meter Authorisation System

Apr 2023 – Aug 2023

IoT · Python · Cryptography · Telecom Security

- ▶ Paid research internship under Prof. Abhinav Kumar; engineered a **multi-layer security and authorisation framework** for smart meters in telecom networks, focusing on cybersecurity for power grid infrastructure.

TECHNICAL SKILLS

AI / ML & Cloud: RAG Architecture · LLM/MLM Evaluation · Hybrid Search · Vector Reranking · Prompt Engineering · AWS (OpenSearch, Lambda, S3) · Azure (AZ-900 ✓, AZ-204 in progress)

Languages: Python · JavaScript · SQL · C · C++ · HTML · CSS

Web & Backend: React.js · Node.js · Express.js · Three.js · Firebase · Tailwind CSS · Bootstrap

Data & Automation: Microsoft Power Automate · Power BI · Git · GitHub · LaTeX · Linux

CERTIFICATIONS

Microsoft Azure Fundamentals — AZ-900 ✓ Certified

Microsoft · 2025

Microsoft Azure Developer Associate — AZ-204 (In Progress)

Microsoft · Expected Apr 2026

EDUCATION

Indian Institute of Technology (IIT) Hyderabad

2021 – 2025

B.Tech — Mechanical & Aerospace Engineering CGPA: **9.02 / 10.0**

Minor in Entrepreneurship CGPA: **8.23 / 10.0**

XII — APBIE (97.1%)

Sri Chaitanya Junior College | 2021

X — CISCE/ICSE (92.3%)

De Paul School | 2019

LEADERSHIP & SOCIAL IMPACT

General Secretary — NSS IIT Hyderabad

2024 – 2025

- ▶ Led **150+ volunteers** to organise the **first-ever IITH Half Marathon 2024**; orchestrated the Swachhata Hi Seva Campaign engaging **190+ participants** across campus, hospital, and village communities.
- ▶ Launched **IITH's first NSS Magazine** at National Youth Day (250+ attendees); directed Vidyadaan/Margdarshan sessions reaching **500+ government school students** and led a Blood Donation Camp collecting **153 units**.

Software & Simulations Head — Tinkerers' Lab, IITH

2023 – 2024

- ▶ Led a **15-member team** to build the IIC website and a Micromouse Simulation Game for MILAN cultural fest; co-organised THRUST 2024 Tech Fest.

Hospitality Head — MILAN, Diesta & MAE Department Day

2023 – 2024

- ▶ Managed guest logistics and hospitality for **MILAN** (50+ events), **Diesta**, and executed the **inaugural MAE Department Day** — commended by the Head of Department & Director.
